Bootstrap,
Handlebars,
Android SDK
Powerpoint

Experience

Student | General Assembly Web Development Immersive | June 2014 – Present
General Assembly WDI is a 12 week full time full stack web development course. The dense curriculum results in 12 hour days of coding in various languages, either alone, in a group, or pair programming. The course curriculum includes JavaScript, Node.js, Express, Ruby on Rails, and Angular.

Project | Massachusetts Pet Fox Legalization
An online petition where users can register their contact information towards changing state law regarding fox ownership. Ruby on Rails, Ajax, ActiveRecord, Java Script, Html, CSS.

Project | Play4Free
Community driven online list of free games from across the net where registered users can add to the database. ActiveRecord, Ruby, Rails, JavaScript, HTML, CSS, Ajax.

Group Project | Nozama
Mock shopping site created by four people as a way for users to purchase organic products. My focus was creating and implementing a user contributed data base for inventory items using NodeJS/Mongoose/Express and jtemplates.

Other Education

RampUp Program, Startup Institute, Boston, MA | 2014
3 month intro to Ruby in both a classroom and workshop environment. Emphasis on creating both solo and collaborative projects.

Monroe Community College, Rochester, NY | 2010 - 2012
Associates of Science | Computer Systems Technologies
3.5 GPA, 2009-2012 Dean's List, Cisco Academy, Volunteer Worker for "Be The Match Bone Marrow Drive" 2009, 2011.
